

Dear Doctor,

I was in Mountainside Hospital, New Jersey for over 23 years as full Partner in a private practice group with AP/CP Board Certification. I have broad experience in Surgical Pathology with special interest and expertise in GI pathology, breast pathology, GU pathology and cytopathology.

I served as the Associate Director of the Dept of Pathology for over 15 years, Associate Director of the Blood Bank, Chair of The Blood Utilization Committee of the hospital and member of the Credentials Committee.

We currently had 10,000 surgicals and I handled 40% of the Surgical workload, taking 2 surgical days a week along with Administrative duties.

I am interested in applying to your hospital and would welcome the opportunity to speak to you about my experience and the services that I can offer to your Department.

Thank you again for your consideration,

Best Regards,

Manimala Roy, M.D.
